network offers 10 times faster Internet connectivity speeds than previously offered by Carnival.All system upgrades, hardware changes, and new Internet equipment installations were made during ship-dock renovations. In February 2018, Carnival Corporation partnered with SES Networks to provide the industry's greatest bandwidth to an on-board mobile platform (first introduced on Regal Princess). The new technology has broken all previous myths about the limitations of high-sea connectivity. The fastest internet cruise ship remained affordable (priced at USD 10 per day). The technology combines SES Networks satellites with MedallionNet and provides a minimum bandwidth of 1.5 gigabits per second to the ship. The tests were conducted on February 26, 2018, while the Regal Princess was docked on the private island of Princess Cays Bahamas. During the tests, the Internet speed of 2.6 gigabits per second was reached. Regal Princess is one of the Medallion-class Carnival Corporation-related ships MedallionNet.Carnival cruise ship Internet CafeThe Internet Cafe is open 24 hours as a meeting place, it features private PC terminals (Windows XP) for web browsing, chat, and email services. For the convenience of guests, there is an Internet Cafe Manager for assistance. Here passengers can sail the following carnival free websites: Carnival.com, GoCCL.com, JohnHealdsBlog.com, CellularATSea.com, and BarclayCardus.com (Carnival World MasterCard). All of these sites can be accessed without purchasing an Internet plan. At YOUR PC terminals, you can't edit MS Office documents, but most files can be viewed (in read-only mode). Carnival WiFi, the Fun Hub website and the HUB Carnival Fun Hub website can be accessed via wi-fi enabled devices. Guests must connect to the Carnival WiFi network and open an internet browser. Fun Hub is also accessible in the free locations of internet cafés with 24-hour access. Currently available on Carnival Breeze, Dream, Magic, Sunshine and Vista, Fun Hub locations allow passengers free access to daily updated information sites. The Fun Hub website details the ship's many activities, including: daily events, youth programs, entertainment options, food and beverage offers, location descriptions, menu and weather information examples, the latest news, sportskey scores to the ship's on-board board announcements of plans and frequently asked questions maps. A filter option helps schedule guests' day. FunHub is available free of charge on any Internet Café Fun Hub computer or Wi-Fi device. Internet access to sites that are outside the Fun Center is also available wirelessly and through all Fun Hub locations. Fees will apply. In August 2015, Carnival announced that the HUB app, which provides passengers with free access to on-board account balances, daily schedules, deck plans, dining information and an innovative chat feature, was so well received (following the successful trial period on Carnival Breeze) that it was scheduled to debut on all Carnival ships by the summer of 2016. Next in line, ready to welcome the HUB app, are Carnival Conquest, Carnival Glory, Carnival Pride, and Carnival Sunshine, by the end of 2015.The new HUB mobile app offers guests a look, convenient view of the ship's features and facilities, along with updates on the events taking place on board, all free of charge. The app is available for download from the Google Play Store and Apple App Store. Its innovative chat feature allows passengers to exchange messages with their companions using their mobile devices. A fixed fee of \$5 applies for the entire cruise. The HUB app also includes accurate daily schedules of hundreds of events on board, information about beverage and food places, Sail & Sign account balance, itinerary details, searchable deck plans, and more. Recently added options offer the ability to pre-purchase Carnival's Bottomless Bubbles Gambling! Beverage programs and upload photos displayed on 270-sq.foot Seaside Theatre during the cruise. Additional features are to be added in the future. Carnival Corporation has launched a new WiFi@Sea system on all cruise ships sailing in the Caribbean. The launch of the global fleet continued with Alaska (summer 2015) and in 2016 expanded to Europe (Baltic Sea, Mediterranean, Mediterranean, Europe) and Asia.At the following CruiseMapper link, you can compare on-board internet pricing package on Royal Caribbean and NCL ships.
